TORGIMA FULL SYSTEM ALIGNMENT REPORT

Generated: 2026-06-17T11:11:33.985Z

Executive Summary

This report answers: Does TORGIMA operate as one synchronized execution engine from Free Erector !’ Paid Intake !’ Baseline !’ Blueprint !’ Orders !’ Feedback !’ Signals !’ Conditions !’ Adaptation?

• Overall readiness: PASS (local runtime + full lifecycle E2E)

• Production readiness verdict: NEEDS MINOR FIXES (production verification not executed in this run; Bhudhi forced fallback flag is enabled by policy)

System Health Score

• Score: 92/100

• Critical blockers: 0 (local)

• Non-blocking warnings:

- Bhudhi forced fallback policy enabled (bhudhi_force_fallbacks=true)

Engine Health Table

Engine | Status | Input | DB writes | Event handoff | Next engine | Tests | Notes

Free Erector | PASS | PASS | PASS | PASS | PASS | E2E | Rate limit + report + handoff token

Handoff | PASS | PASS | PASS | PASS | PASS | E2E | Prefill to paid intake

Paid Intake | PASS | PASS | PASS | PASS | PASS | E2E | Section 9 supported

Erector Baseline | PASS | PASS | PASS | PASS | PASS | E2E | Reality package persisted

Blueprint | PASS | PASS | PASS | PASS | PASS | E2E | Execution chain generated

Task/Orders | PASS | PASS | PASS | PASS | PASS | E2E | Orders include baseline + archetype

Feedback | PASS | PASS | PASS | PASS | PASS | E2E | Blocked for pre_generated orders

Signals | PASS | PASS | PASS | PASS | PASS | E2E | Snapshot + condition chain

Conditions | PASS | PASS | PASS | PASS | PASS | E2E | Control creates enforcement package

Control/Enforcement | PASS | PASS | PASS | PASS | PASS | E2E | Task generation constrained

Bhudhi Wiring | PASS | PASS | N/A | N/A | N/A | bhudhi:smoke | Forced fallback flag currently enabled

Events/Workers | PASS | PASS | PASS | PASS | PASS | events:verify | No pending/DLQ after verify

Schema Alignment | PASS | PASS | PASS | N/A | N/A | db:verify-runtime | Seeds + partial indexes verified

Auth/Security | PASS | PASS | N/A | N/A | N/A | E2E | Cross-user protection asserted

Codebase Map (machine-derived)

• erector: 27 files (sample: lib/db/dist/erector-seed.d.ts, lib/db/migrations/20260617023300_blueprint_erector_baseline_execution_lock.sql, lib/db/migrations/20260617024400_paid_intake_session_state.sql, lib/db/src/erector-seed.ts, migrations/0000_recovery_schema_sync_baseline.sql, migrations/0006_erector_execution_bridge.sql)

• blueprint: 66 files (sample: DOC_10_50_BUSINESS_BLUEPRINTS_SPECIFICATION.md, DOC_13_BLUEPRINT_FRAMEWORK_INTEGRATION_MATRIX.md, DOC_18_TASK_GENERATION_WITH_BLUEPRINT_CONSTRAINTS.md, DOC_19_SIGNAL_CALCULATION_WITH_BLUEPRINT_VALIDATION.md, DOC_21_PROMPT_LIBRARY_WITH_BLUEPRINT_INTEGRATION.md, DOC_23_MEMORY_SYSTEM_WITH_BLUEPRINT_CONTEXT.md)

• tasks: 2 files (sample: lib/api-zod/dist/generated/types/orderStatus.d.ts, lib/api-zod/src/generated/types/orderStatus.ts)

• feedback: 36 files (sample: lib/api-zod/dist/generated/types/answerFeedbackInterrogationBody.d.ts, lib/api-zod/dist/generated/types/executionFeedbackInput.d.ts, lib/api-zod/dist/generated/types/executionFeedbackInputBlockerJson.d.ts, lib/api-zod/dist/generated/types/executionFeedbackInputCompletionStatus.d.ts, lib/api-zod/dist/generated/types/executionFeedbackInputProofJson.d.ts, lib/api-zod/dist/generated/types/feedback.d.ts)

• signals: 17 files (sample: DOC_19_SIGNAL_CALCULATION_WITH_BLUEPRINT_VALIDATION.md, lib/api-zod/dist/generated/types/dashboardStateSignalBlueprintBridgeItem.d.ts, lib/api-zod/dist/generated/types/dashboardStateSignalProjection.d.ts, lib/api-zod/dist/generated/types/signalSnapshot.d.ts, lib/api-zod/dist/generated/types/signalSnapshotCondition.d.ts, lib/api-zod/dist/generated/types/signalState.d.ts)

• conditions: 10 files (sample: lib/api-zod/dist/generated/types/dashboardStateConditionDetail.d.ts, lib/api-zod/dist/generated/types/dashboardStateEnforcement.d.ts, lib/api-zod/dist/generated/types/signalSnapshotCondition.d.ts, lib/api-zod/dist/generated/types/signalStateCondition.d.ts, lib/api-zod/src/

generated/types/dashboardStateConditionDetail.ts, lib/api-zod/src/generated/types/dashboardStateEnforcement.ts)

• bhudhi: 54 files (sample: DOC_14_BHUDHI_46_QUESTIONS_ROUTING.md, DOC_20_TRIGGER_ROUTER_IMPLEMENTATION.md, _bhudhi_frameworks_extracted/_parsed_460_frameworks.json, lib/db/dist/bhudhi-seed-data.d.ts, lib/db/dist/bhudhi-seed.d.ts, lib/db/dist/schema/bhudhiTables.d.ts)

• handoff: 1 files (sample: scripts/validation-contract-handoff-e2e.mjs)

• events: 10 files (sample: lib/api-zod/dist/generated/types/getBlueprintExecutionFeed200DataEventsItem.d.ts, lib/api-zod/src/generated/types/getBlueprintExecutionFeed200DataEventsItem.ts, scripts/events-drain-once.mjs, scripts/events-prod-drain-once.mjs, scripts/events-prod-verify.mjs, scripts/events-verify.mjs)

• dashboard: 28 files (sample: lib/api-zod/dist/generated/types/dashboardState.d.ts, lib/api-zod/dist/generated/types/dashboardStateActiveBlueprint.d.ts, lib/api-zod/dist/generated/types/dashboardStateAlertsItem.d.ts, lib/api-zod/dist/generated/types/dashboardStateAlertsItemSeverity.d.ts, lib/api-zod/dist/generated/types/dashboardStateConditionDetail.d.ts, lib/api-zod/dist/generated/types/dashboardStateCurrentAction.d.ts)

Handoff Matrix (high-level)

• Free Erector !’ Handoff: free validation row + handoff token persisted

• Handoff !’ Paid Intake: intake session created + prefill applied

• Paid Intake !’ Erector Baseline: submit emits baseline request; baseline worker persists reality package + updates blueprint

• Baseline !’ Blueprint: execution generation requested; blueprint chain created; orders generated with baseline context

• Orders !’ Feedback: feedback allowed only for eligible statuses (not pre_generated)

• Feedback !’ Signals !’ Condition !’ Control !’ Tasks: signal snapshot + current condition + enforcement package + task generation requested

Broken / Missing Items Fixed (this run)

• Orchestration lock contention no longer dead-letters causation events (OrchestrationLock)

• Paid intake normalization + validation requested events now persist blueprint_id on the event row (IntakePipeline)

• Event routing corrected so erector_intake_normalized and erector_validation_requested are not misrouted into the validation-*started* worker (eventContracts.ts)

• E2E test hardened: order selection now chooses feedback-eligible statuses; hooks allow realistic startup time

• Test fixture cleanup expanded to delete Erector governance rows that reference users (verdict decisions + decision audits + explanations)

Verification Results

• db:verify-runtime: PASS

• bhudhi:smoke: PASS

• events:verify: PASS

• typecheck: PASS

• build: PASS

• full lifecycle E2E: PASS

Remaining Blockers

• Production verification commands were not run here (requires production credentials / safe environment).

Recommended Next Actions

• Run production-safe verification (pnpm db:prod:verify-runtime, pnpm events:prod:verify, pnpm bhudhi:prod:verify) in the production environment.

• Decide whether Bhudhi forced-fallback policy should remain enabled outside tests.
